

Methods Solve Productivity And Consumption: Challenges? (Paperback)

Filesize: 2.89 MB

Reviews

This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It has been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, after the way I believe.

(Prof. Loyce Runolfsson Jr.)

Independently Published, United States, 2019. Paperback. Condition: New. Language: English. Brand new Book. Can apply behavioral economic method to predict that the consequences of a stable basic income consumer's consumption behavior? It may be significantly different than the ones are predicted by the standard economic model if more realistic assumptions of human consumption behavioral prediction success. Behavioral economic method assumes that consumer will compare whether whose benefits are more than costs after they buy the product or consume the service. I assume the consumer is only the who have stable basic income source consumer target. This stable basic income target consumers who will evaluate or feel they will earn more benefits than costs to every product in their consumption process, after they will make final decision to choose to buy the product to use or consume the service. Otherwise, if they feel they won't earn more benefits after they buy the product or consume the service in the consumption process. Then, they won't choose to buy the product to use or consume the service. In behavioral economic view point, it indicates their consumption behaviors are depend on comparing the product or the service whether it can satisfy their desire benefits and their desire benefits to the product or service must be more than their consumption cost. There are four points to apply behavioral economic method to predict each stable basic income individual income spending. They include: motivation, conspicuous consumption, social preferences and crowding theory. Each stable basic income consumer individual spending amount will be different and it is represent that every high stable basic income consumer must decide to consume any high cost services or buy high cost products to use. Although some economic teachers assume general high income people will accept to spend more expenditures for enjoyment or buy high cost...
